## Summary

I finished among the top 10 students at Workintech educational institution, outperforming 1200 candidates, by successfully completing 45 frontend and 22 backend projects. Throughout my software journey, I diligently determined, built, and tested project requirements, adhering to the Agile development model. I effectively resolved issues encountered during project development and actively contributed to group management and collaboration. Looking ahead, my ambition is to leverage my project development skills and the team training I have received to make a meaningful impact in a professional setting. By doing so, I aim to continuously enhance my own abilities while driving growth for the company.

---

## Experience

### Full Stack Developer | Workintech | Jan 2023 – Present

- Developed daily projects in HTML, CSS, JavaScript, DOM manipulation and React.js for 2 months. Collaborated with experts and presented challenge projects.
- Created backend projects using Node.js, Express.js, and MySQL for a month. Conducted API testing with JEST.
- Completed daily projects in C# programming language for a month, including a backend project.
- Engaged in algorithm studies and participated in weekly team meetings with expert software developers. Also focused on CV and interview preparations.
- Worked with React.js, Material UI, and d3.js on the frontend, and C#, .NET Core, and Entity Framework on the backend. Collaborated on a CRM pipeline project using MSSQL on database.
- Successfully completed 960 hours of training, delivered 70+ projects, and passed 20 assessment challenges. Demonstrated strong teamwork skills and adaptability to agile methodologies.

### Static Design & Site Engineering | MCA Construction & Engineering | 2018 – 2022

- Supervised construction sites and managed the construction of villa-type structures in Kas/Antalya.
- Static loading and calculations of hangar type steel construction projects with sap2000 program.
- Creation and follow-up of reinforced concrete projects for 6 silo warehouses constructed in Nigeria.

# Education

**Celal Bayar University | Civil Engineer | Sep 2014 – Jun 2018**

---

## Skills

- React.js
  - .Net Core
  - Express.js
  - Tailwind CSS
  - C#
  - JavaScript
  - Cypress
  - EF Core
  - JEST
  - CSS3
  - Node.js
  - Redux
  - SQL
  - Agile
  - MongoDB
  - Java
  - HTML5
  - PostgreSQL
  - (Scrum)
- 

## Languages

English(Fluent) & Russian(Conversational)

---

## Projects

**CRM Pipeline Customer Credit Approval Interface | React.js , C# , EF Core , MSSQL , D3.js**

- JS, React.js, D3.js on frontend
- C#, .Net Core, EF Core on backend
- Using MSSQL for database
- Using scrum and agile methodologies

**Twitter Clone Backend Project | Node.js , Express.js , Knex , JWT , JEST , SQLite , Rest API**

- Node.js on backend
- JEST for testing
- Utilized libraries such as Express.js, Knex, JWT, and bcrypt.
- Used SQLite for database

**Pizza Order Website | React.js , CSS3 , YUP , Cypress , HTML**

- Web application using the React.js library
- For design using CSS, Reactstrap
- Using Yup validation and react-hook-form library for forms
- E2E testing with Cypress

**Portfolio Website | React.js , CSS3 , Tailwind CSS , Cypress**

- Web application using the React.js library
- For design using CSS, Tailwind CSS
- E2E testing with Cypress
